

## Brazilian Girls: Talk To La Bomb

A carnival of futuristic retro-sounds, the [Brazilian Girls](#)' second full-length album, *Talk To La Bomb*, is like a trip to a smoke-filled red velvet circus tent in a fish-eye dream. The Brooklyn-based quartet's signature mix of sexy pop-house and stage theatrics (mainly on photogenic lead vocalist Sabina Sciubba's part) has made them international couture and music scene darlings and *La Bomb* is a natural and dynamic follow-up to their self-titled debut and a dramatic expansion of its range. This time the frenzy is more feverish and the opium-cloud quiet is more nuanced and dreamy, but with an emphasis on the harder stuff overall.

Kicking things off, "Jique" opens with a tease of featherweight electric organ but quickly explodes into a dance-rock epic reminiscent of an amped-up Blondie with strings, setting the tone for the album. "All About Us" follows with a harmonious marriage of soulful house, afrobeat, and melancholia that only the Girls could pull off. And that's just the beginning. Due in stores 12 September 2006, you can pre-order from [Verve](#) or [Amazon](#).
